

Superfeed White

QS 623

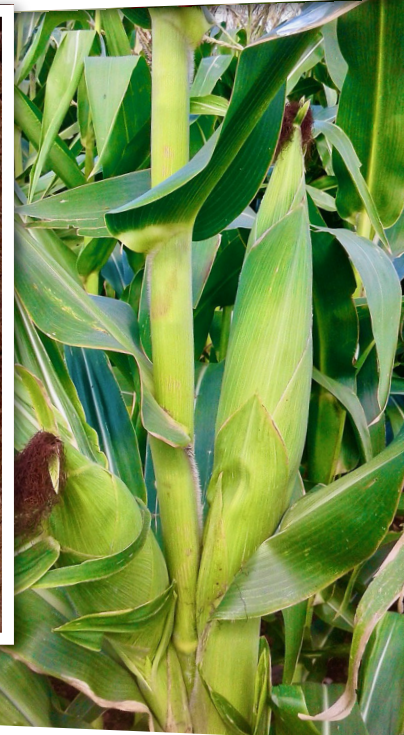

A Non-GMO quality protein white maize hybrid with stable yield. The grain has increased levels of lysine and tryptophan, ideal for pig and poultry feeds. Also a valuable high nutrition superfood for human consumption.

Advantages

- QS623 is a QPM variety with high quality protein.
- Use of QPM as feed has been shown to have a dramatic impact on growth of animals (see the resources page on QualitySeed.co.za for research papers and studies).
- Suitable for dry land conditions.
- Excellent prolific drought-tolerant variety with very good disease resistance.
- Plant population up to 40 000 plants/ha.

QS 623

Packaging

Available in 60 MK (60 000 Maize Kernel) packaging. Other packaging is available upon request.
